祝贺同学们成功晋级半决赛!下面我们将为您详细介绍半决赛与决赛的具体要求与规则

Congratulations! You made it to the semi-final! Next we will give you a detailed description of the specific requirements and rules for the semi-final and final

比赛题目 Competition case

本次大赛设置了两个比赛题目,每个小组需要选择其中一个题目参加比赛 There are two case questions provided for the competition. Each team needs to choose one

重要提示:

半决赛与决赛的比赛题目保持一致, 同学们需要根据选择题目的要求设 计开发出相应的参赛作品。

Note:

Competition cases are consistent for both Semi-finals and finals. Participants need to follow the instructions for each case.

题目一: 企业画像

Case 1: Create a Company Profile

题目

Case

近年来大数据互联网得到了高速发展, "企业画像"已经成为各行业的经营管理过程中的重要决策依据。通过多种途径收集企业基本资料、业务财务、关联关系、外部评价等信息,按照一定的分析框架构建企业画像体系, "企业画像"应用程序可以帮助决策者们主动识别企业相关的特征,控制经营风险。

With the rapid development of big data, "company profile" has become important in decision-making process for business activities and supervision. Decision makers can identify features and risks for a company by collecting information on a company's basics, finance, inter-company relationships, external evaluation, etc. Based on such analysis framework, decision makers can create a company profile and proactively identify the characteristics and risks related to enterprise.

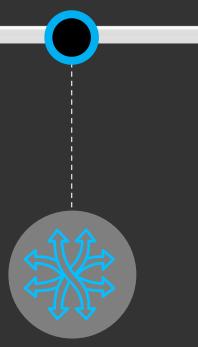

说明

Instructions

参赛选手可选择特定行业或企业的业务场景, 比如:商业银行构建"企业信用画像"确定 信贷客户的风险等级;海关建立企业行为画 像,通过人工智能分析有效识别企业的行为 特征和风险等级。 Participants can choose a specific industry or enterprise's scenario. For example, a bank can identify credit risk level for customers by using their company profiles; A Customs can create company profiles, identify companies behavior and risk level using artificial intelligence and improve management efficiency.

题目二: 乡村教师好助手

Case 2: : Create a virtual teaching assistant for schools in rural areas

题目

Case

优质教育资源主要集中在大城市,而乡村教育资源相对匮乏,为了使乡村同学们也能获得更好的教育资源,我们需要开发一个"乡村教师好助手"的应用程序,帮助老师们减轻工作负担,提升乡村教学质量。

目前我国的教育资源在各地区分配不均衡,

At present, educational resources in China are unevenly distributed in different regions. High-quality education resources are mainly concentrated in big cities, while rural education resources are relatively scarce. We need to develop an application called "TA in Village School" to help teachers reduce the work burden and improve the quality of teaching.

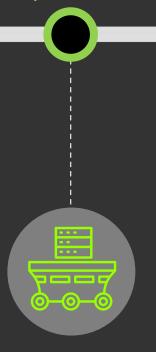

说明

Instructions

参赛选手可自行选择特定场景,不需要大而 全的教学平台,通过语言识别、图像识别、 自然语言处理等技术打造智能化教学应用, 比如口语评测,智能批改作业,个性化教学 等。 Participants can choose a specific scenario where a large and full education platform is not necessary. Participants can use speech recognition, image recognition, natural language processing and other technologies to build an intelligent education application with features such as speaking test, assignments review or personalized teaching.
